

MONTEC — THE ARENA · 17-Second Video + Captions

Продукт: Desk Mat · Batch 001 · “The Battlefield” **Концепция:** “Defining the boundaries of your influence on the workspace. The leather foundation upon which every great strategy is mapped and executed.”

Бренд-примечание (сквозное для всех кадров с логотипом): Логотип и надпись MONTEC — **blind emboss** (слепое тиснение): рельеф, вдавленный в кожу без краски, без фольги, тон-в-тон с материалом. Видим только за счёт светотени, никогда за счёт цветового контраста.

Shot List

#	Время	Кадр
1	0:00–0:02	Macro — edge-paint finish кромки мата, палец проводит по краю
2	0:02–0:05	Overhead reveal — мат разворачивается на тёмном столе
3	0:05–0:09	Setup — laptop, часы, телефон размещаются на мате сверху вниз
4	0:09–0:12	Средний план — рука печатает/пишет, мат как основа кадра
5	0:12–0:14	Макро — тиснёный emboss-знак MONTEC, свет скользит по коже
6	0:14–0:15	Cut to black
7	0:15–0:17	Coming Soon

SHOT 1 — 0:00–0:02 · Macro Edge Detail

Prompt: “Extreme macro shot, 100mm macro lens, f/2.8. A man’s fingertip traces slowly along the precisely finished edge-paint border of a dark chestnut-brown full-grain leather desk mat, resting on a dark walnut or matte-black desk surface. The edge-paint line is perfectly uniform, deep espresso-brown, catching a thin razor of highlight along its bevel as the finger moves past. Shallow depth of field — only the edge and fingertip in sharp focus,

the mat's surface texture falling into a soft blur beyond 3cm. Single soft window light from camera-left, 5200K, no fill. Colour grade: warm neutral, natural leather browns, no saturation push. Camera static with barely perceptible handheld micro-drift, 2 seconds real-time."

Свет: одно окно слева, 5200K **Логотип:** не в кадре

SHOT 2 — 0:02–0:05 · Overhead Reveal

Prompt: "Top-down overhead shot, 35mm lens, f/2.8, camera mounted directly above a dark matte desk surface. The MONTEC leather desk mat is unrolled or laid flat by an out-of-frame hand in a single smooth motion, revealing its full flat-lay silhouette against the contrasting dark desk beneath — the mat's warm chestnut-brown tone the only saturated colour in an otherwise near-monochrome frame. In the lower right corner of the mat, a blind-embossed MONTEC monogram seal sits tone-on-tone, visible only as a subtle relief under the raking light of a single softbox positioned at a low, oblique angle to maximize texture separation without introducing colour contrast. Camera holds static once the mat settles, 3-second duration, very slight settle-and-still motion at the end. Colour grade: near-black desk surface, warm leather tone isolated, minimal saturation elsewhere."

Свет: софтбокс под низким углом сверху, для выявления рельефа тиснения **Логотип:** blind emboss в углу мата, читается только под косым светом

SHOT 3 — 0:05–0:09 · The Setup

Prompt: "Medium overhead-angled shot, 50mm lens, f/2.2, camera at roughly 45 degrees above the desk. A sequence of objects are placed onto the MONTEC desk mat by an out-of-frame hand in slow, deliberate motion: first a closed silver laptop, then a leather watch tray with a wristwatch, then a smartphone face-down — each placed with intention, no fumbling, roughly one object per 1.3 seconds. The desk mat's leather grain remains visible in the negative space between objects, its blind-embossed corner mark occasionally catching light as the hand's shadow passes near it. Lighting: soft overhead key light with gentle fill from a large diffuser to keep shadows readable but not harsh. Colour grade: cool-neutral desk environment (silver laptop, dark surfaces) contrasted against the single warm leather element — the mat is visually the emotional center of an otherwise cold, efficient frame."

Свет: мягкий верхний ключевой + рассеянный fill **Логотип:** blind emboss в углу, эпизодически освещается тенью движущейся руки

SHOT 4 — 0:09–0:12 · Hands at Work

Prompt: "Medium close shot, 50mm lens, f/2.0, slight low angle looking across the desk surface. A man's hands — same talent as previous Founder/Executive shots for continuity, clean and well-groomed — rest on a closed notebook or type briefly on a keyboard positioned atop the MONTEC desk mat, the leather visible framing the bottom and sides of the frame like a foundation. Natural, unhurried micro-movements — a pen tap, a page turn — nothing performative. Shallow depth of field keeps the hands and immediate desk surface sharp while the background (bookshelf, window, or wall) falls into soft bokeh. Lighting: warm practical desk lamp key from camera-right, combined with cooler ambient window fill from behind, creating a subtle warm-cool contrast that flatters the leather's tone. Colour grade: warm midtones on hands and leather, cooler and desaturated in the background."

Свет: тёплая настольная лампа справа + прохладный фон от окна **Логотип:** не акцентируется, кожа мата — фоновая текстура кадра

SHOT 5 — 0:12–0:14 · Macro Emboss

Prompt: "Extreme macro shot, 100mm macro lens, f/4. Frame filled entirely with the dark chestnut leather surface of the desk mat, centered on the blind-embossed MONTEC monogram seal — no ink, no foil, pure tone-on-tone relief. A single directional light source sweeps slowly across the surface over the 2-second duration, sequentially revealing the depth of the emboss through shifting shadow rather than colour contrast — the mark seems to emerge from and recede back into the leather as light travels across it. Natural grain and micro-texture of the full-grain hide sharply visible throughout. No saturation boost — natural tanned-leather browns only."

Свет: узкий направленный источник, механическое панорамирование света **Логотип:** главный объект кадра, blind emboss, "проявляется" исключительно светом

SHOT 6 — 0:14–0:15 · Cut to Black

Prompt: "Hard instantaneous cut to pure black (RGB 0,0,0), no gradient, no vignette, held static in complete silence for 0.5 to 1 second."

SHOT 7 — 0:15–0:17 · Coming Soon

Prompt: "Minimalist title card, pure black background. 'COMING SOON' centered in thin-weight Cormorant Garamond-style serif, warm off-white (#F5F5F3), generous letter-spacing (~0.3em tracking). Fade in from 0–100% opacity over 0.6 seconds, slow ease-in, no

scale or position movement. After a 0.3-second hold, a small thin-line mountain-peak monogram fades in beneath the text over 0.4 seconds. No music sting — near-silence, or a single sustained low tone below -30dB."

Общая цветокоррекция

- Near-black shadows, warm neutral midtones, texture of leather never crushed in shadow
- Насыщенность -15/-20% от нейтралы
- Кожа мата — единственный тёплый насыщенный элемент в кадре, всё остальное (техника, интерьер) намеренно охлаждено и приглушено, чтобы мат читался как "фундамент" сцены

Аудио-дорожка

- 0:00–0:09 — тихий эмбиент рабочего пространства (едва слышный гул, лёгкий стук клавиш)
 - 0:09–0:14 — затухание в тишину
 - 0:14–0:17 — полная тишина / низкий тон ниже -30dB
-

Full-grain, vegetable-tanned leather. Flat-lay anti-slip foundation with edge-pai

Batch 001. Coming soon.

Короткий вариант:

MONTEC — THE ARENA

The foundation upon which every strategy is mapped and executed.

Full-grain leather. Edge-paint finish. Seamless construction.

Coming soon.

Тизерный вариант:

MONTEC.

Every battlefield needs a foundation.

Batch 001. Coming soon.

Рекомендую основной — раскрывает функциональную философию (workspace как "поле боя" для стратегии), что отличает Arena от просто "коврика для стола" и держит тон каталога ("The Battlefield").
